

SKILL-BASED COMPETITIVE GAMING

Win on skill, not on luck.

Short tournaments. The same board for everyone. The best run wins.

game4pay.com

NGN · GHS

18+

IN ONE SENTENCE

Game4Pay is a tournament platform where players pay a small entry, play the same game on the same board, and the highest score takes the prize.

No dealer. No wheel. No house side of a bet. Just who played it better.

THE DISTINCTION THAT MATTERS

Skill, not gambling

This is not a claim about intent — it is a property of how the product is built. Each row below is something you can verify by playing.

01 Everyone gets the identical board

Every player in a group receives the same puzzle, generated from the same seed. A score difference cannot be blamed on a luckier deal.

02 No chance decides the result

The games are deterministic. There is no random element anywhere in the win condition.

03 We do not play against you

The platform takes a fixed, disclosed service fee from the prize pool. It has no position on who wins.

04 You are matched by ability

Pairing uses a skill rating derived only from settled results — an expert is not put against a newcomer.

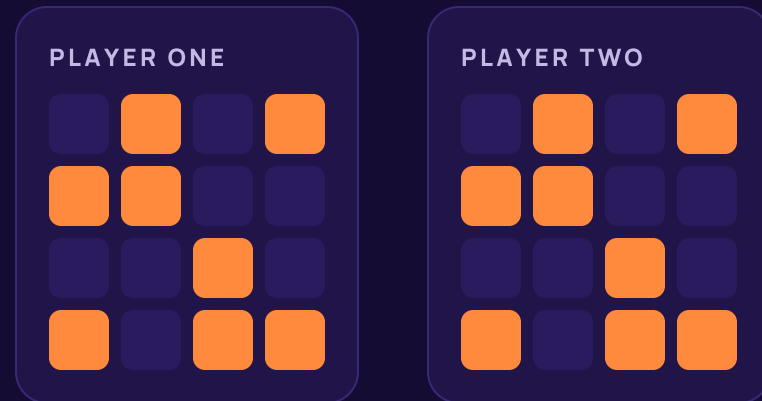

05 It is a contest, not a wager

Entry fee, prize pool, published prize structure, ranked settlement.

THE MECHANISM

Same board. Same clock.

This is the mechanism the whole product rests on, so it is worth being precise about it.

One seed per group

The board is generated once, from a seed tied to the group. Every member is served that board – not a similar one.

The same duration

Everyone gets the same clock, started when they begin their attempt.

Matched by skill band

Groups are formed from players of comparable rating, so the contest is between people who can actually beat each other.

Settlement is deterministic

Scores are ranked, the published split is applied, and the result is recorded. Nothing is adjusted afterwards.

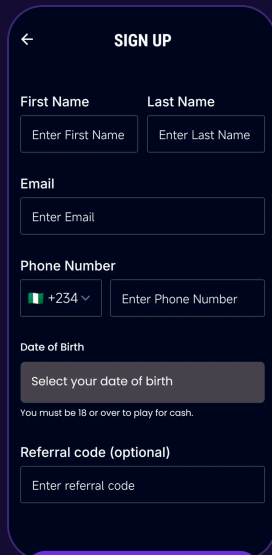

HOW IT WORKS

Four steps

1

Sign up

Email, Google, Apple, Facebook or a passkey. Under a minute.

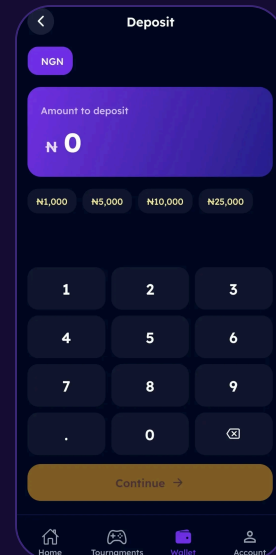

A mobile app sign-up screen with a dark blue background. At the top, there's a back arrow and the text "SIGN UP". Below this, there are two input fields for "First Name" and "Last Name". Then, an "Email" input field. Below that, a "Phone Number" section with a dropdown for the country code (showing "+234") and an input field for the number. Then, a "Date of Birth" section with a date picker. Below that, a note: "You must be 18 or over to play for cash." Then, a "Referral code (optional)" section with an input field. At the bottom, there's a navigation bar with icons for Home, Tournaments, Wallet, and Account.

2

Fund your wallet

Bank transfer, USSD, OPay or mobile money, in NGN or GHS.

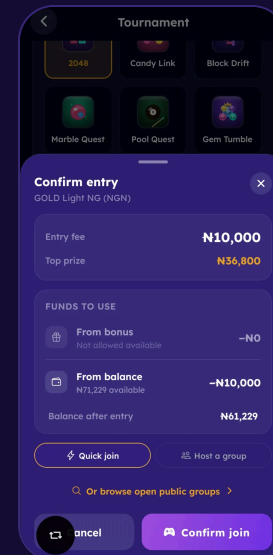

A mobile app deposit screen with a dark blue background. At the top, there's a back arrow and the text "Deposit". Below this, there's a dropdown for the currency (showing "NGN"). Then, a large input field for "Amount to deposit" showing "N 0". Below that, there are four buttons for different amounts: "N1,000", "N5,000", "N10,000", and "N25,000". Then, a numeric keypad with digits 1-9, 0, and a decimal point. At the bottom, there's a "Continue" button. At the very bottom, there's a navigation bar with icons for Home, Tournaments, Wallet, and Account.

3

Join a tournament

Pick a game, see the entry and the prize, join a group.

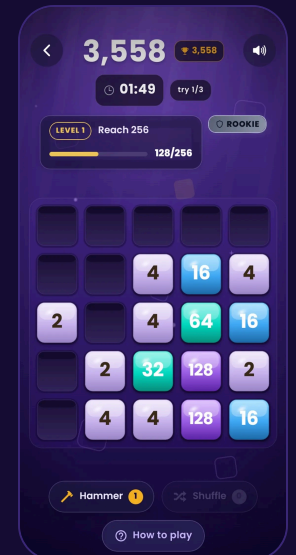

A mobile app tournament entry screen with a dark blue background. At the top, there's a back arrow and the text "Tournament". Below this, there are three game icons: "2048", "Candy Link", and "Block Drift". Then, there are three more game icons: "Marble Quest", "Pool Quest", and "Gem Tumble". Below that, there's a "Confirm entry" modal for "GOLD Light NG (NGN)". The modal shows "Entry fee: N10,000" and "Top prize: N36,800". Below that, there's a "FUNDS TO USE" section with two options: "From bonus" (not allowed) and "From balance" (N71,229 available). Below that, it shows "Balance after entry: N61,229". At the bottom of the modal, there are buttons for "Quick join" and "Host a group". Below the modal, there's a button for "Or browse open public groups". At the very bottom, there are buttons for "Cancel" and "Confirm join".

4

Play and win

Same board as everyone else. Highest score takes the prize.

A mobile app game board screen with a dark blue background. At the top, there's a back arrow and the text "3,558" with a plus icon and "3,558". Below this, there's a timer showing "01:49" and "try 1/3". Then, there's a "LEVEL 1" section with a progress bar and "Reach 256". Below that, there's a "ROOKIE" badge. Then, there's a 4x4 grid of numbers. Below the grid, there's a "Hammer" icon and a "Shuffle" button. At the bottom, there's a "How to play" button.

GETTING THE APP

Three ways in

ANY DEVICE

Install as a PWA

Add it to your home screen on iPhone, iPad, Android, Mac or Windows. Its own icon, its own window, works offline.

ANY DEVICE

Play in any browser

Open game4pay.com and play. Nothing to install, nothing to approve.

ANDROID

Direct download

The Android APK, straight from game4pay.com, with a published SHA-256 checksum.

The installed web app is the full product — same account, same tournaments, same wallet. It is not a cut-down version.

SIGNING UP

However you prefer

- **Email and password**

With a one-time code to confirm it is you.

- **Google**

One tap, native on Android.

- **Apple**

Including Hide My Email.

- **Facebook**

For players who live there.

- **Passkeys**

Face or fingerprint instead of a password, on supported devices.

Enter referral code

SECURITY

Built for money, not for demos

Getting in

- Two-factor authentication (TOTP)
- Passkeys and biometric sign-in
- Device sessions you can review and revoke

Moving money

- Step-up verification on withdrawals
- A transaction PIN
- Velocity limits per period

Your identity

- Tiered identity verification
- Encrypted in transit, always
- Deletion on request — and we say what we must keep

Account deletion is pseudonymisation, not erasure: the ledger is retained for the period anti-money-laundering rules require, with your identity removed from it.

CURRENCIES

Two wallets, one account

NGN

Nigerian Naira

GHS

Ghanaian Cedi

Hold both. Payout corridors follow the CURRENCY of the wallet, not the country on your account.

FUNDING AND WITHDRAWING

In, and back out

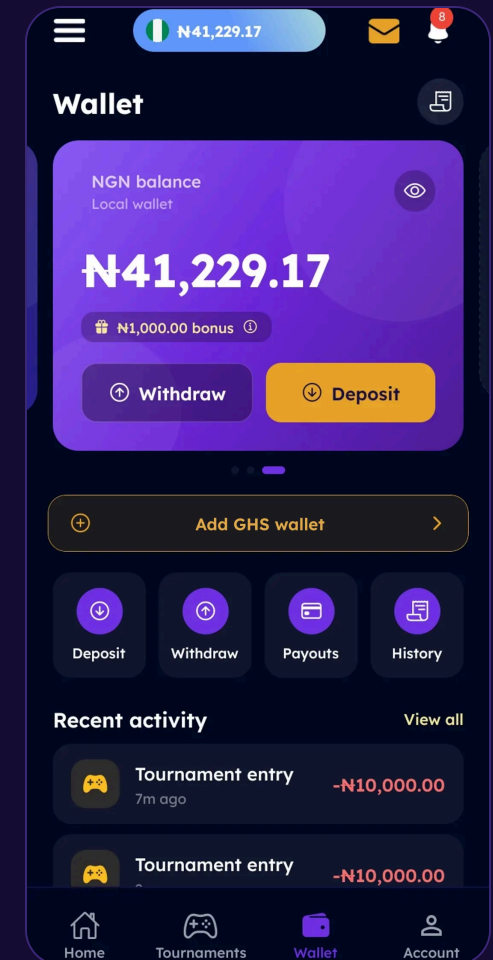

Money in

- Bank transfer and your own account number
- USSD and OPay
- Mobile money (Ghana)

Money out

- Saved payout accounts
- Verified before first use
- Corridor follows the wallet currency

18+ and identity verification apply before money moves either way.

TOURNAMENTS

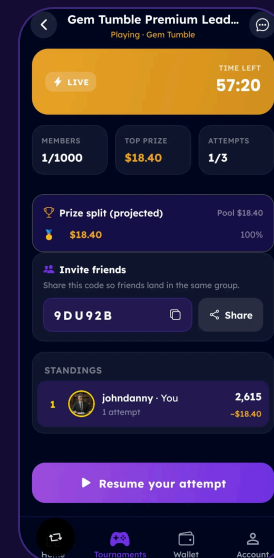

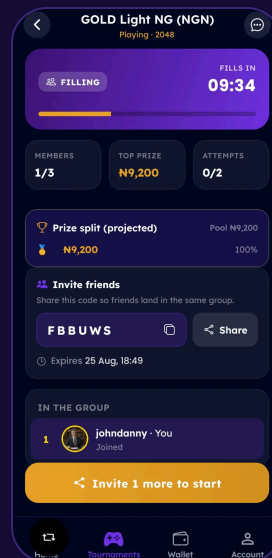

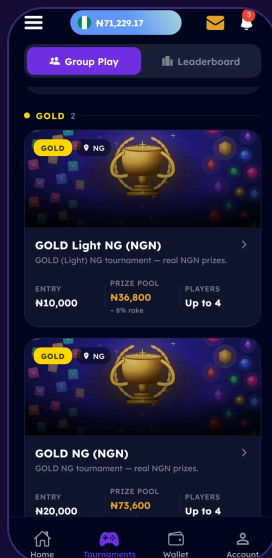

Two shapes

Group

- A fixed number of seats
- Everyone plays the same board
- Starts when the group fills
- Prize split published before you join

Leaderboard

- Open for a set window
- Ranked by best score
- Play now, watch your position
- Settles when the window closes

PLAY WITH PEOPLE YOU KNOW

Host your own

- **Create a private group**

Set the game, the entry and the number of seats.

- **Invite by link**

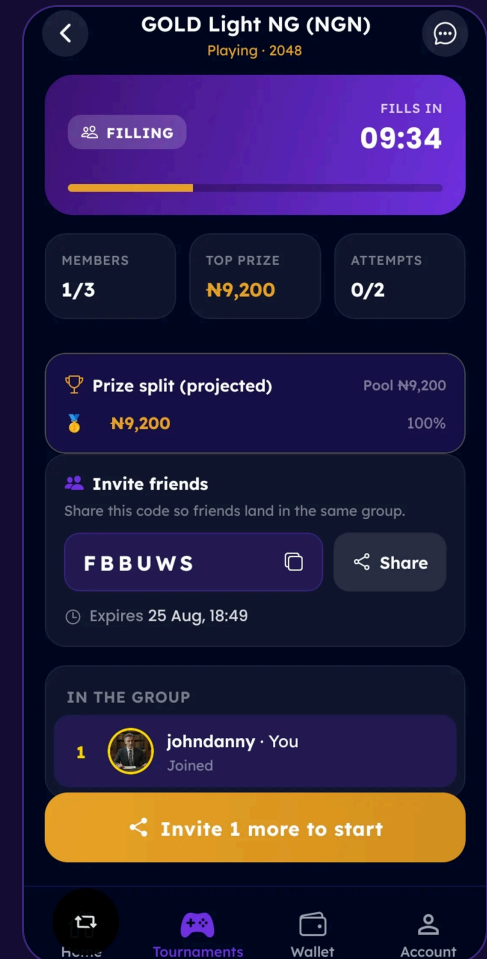

Share it anywhere. They join the same board you do.

- **Chat inside the group**

Messages, replies, reactions and forwarding.

- **Settle automatically**

Same rules, same published split.

THE GAMES

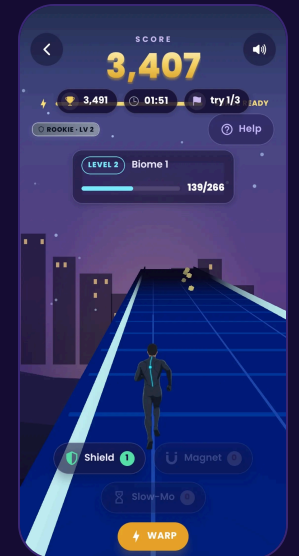

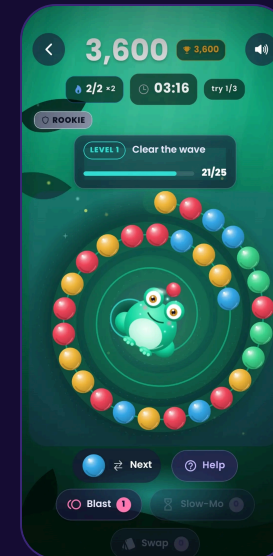

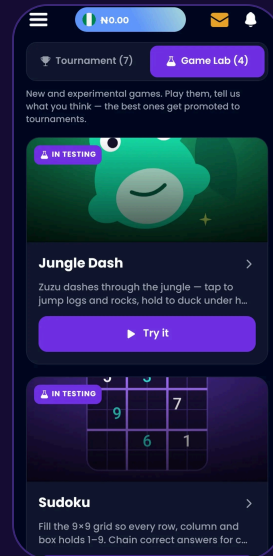

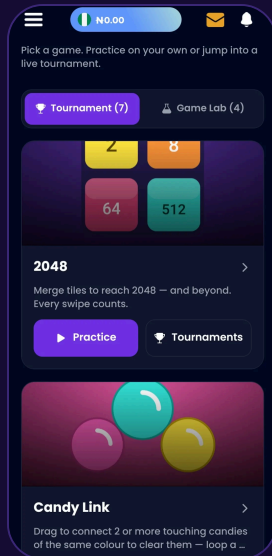

Two tiers

Tournament games

Cash entry, cash prizes, skill-matched groups.

Game Lab

Free to play, practise as much as you like, no entry and no prize.

New titles are added to the Lab first, and promoted once they have been played enough to be understood.

NOT A SOLITARY APP

People

- **Direct messages and group chat**

With replies, reactions, forwarding and read receipts.

- **Leaderboards**

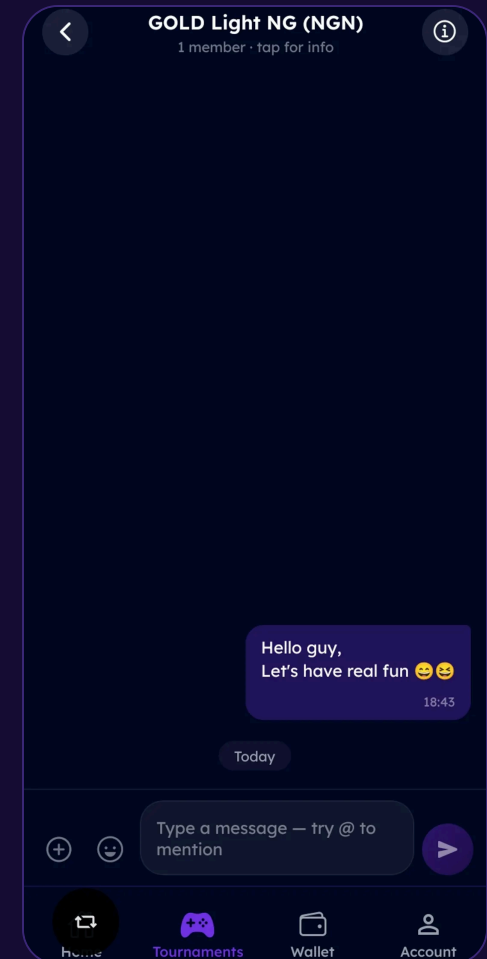

Live during a tournament, and global over time.

- **Referrals**

Bring a friend, both benefit.

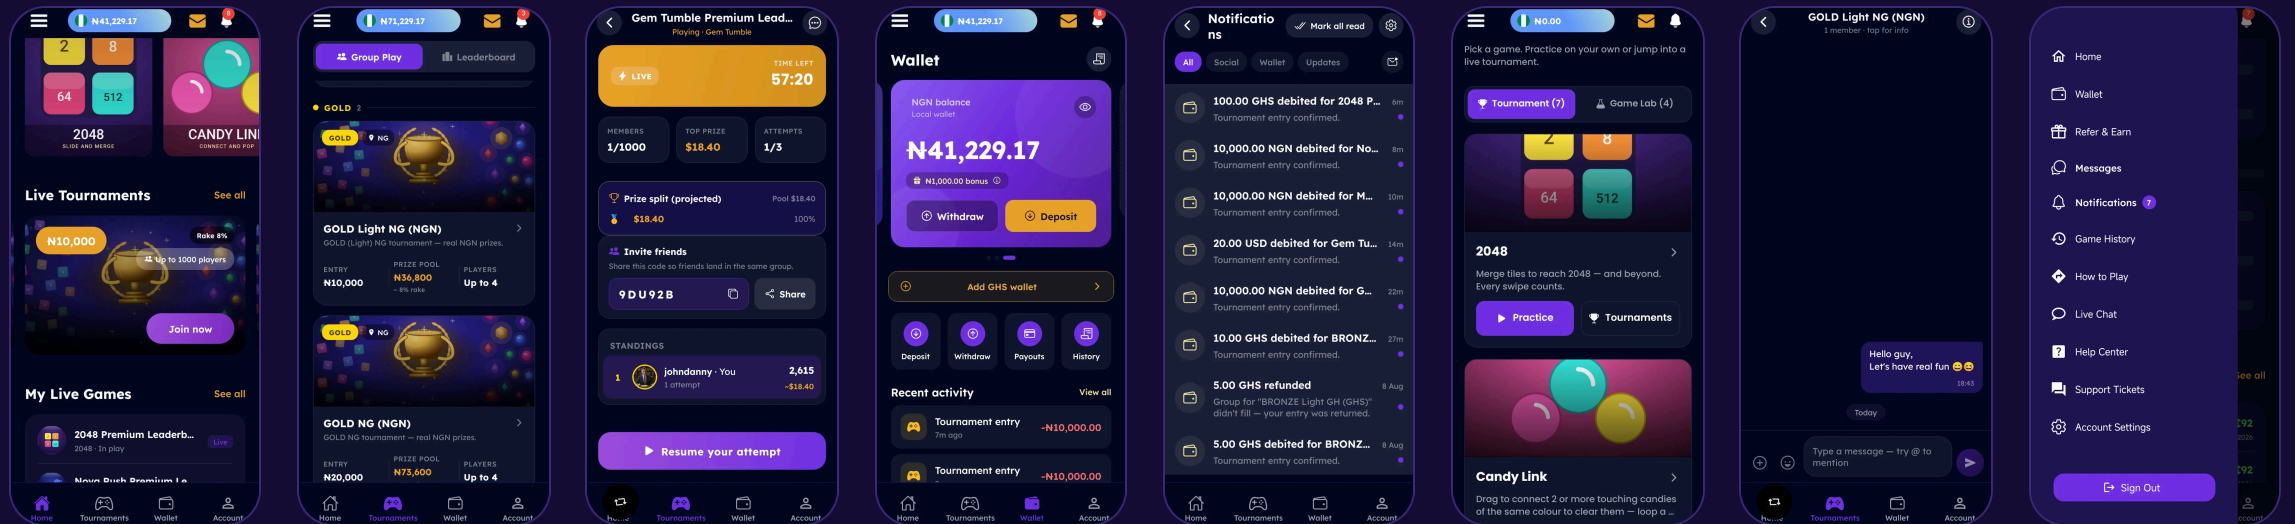

- **Notifications**

Push, in-app, and email — with quiet hours you control.

THE PRODUCT

What it actually looks like

The parts nobody puts on a poster

01 18+ on money, not on the app

Anyone can practise. Paid entry and withdrawal are gated on age.

02 Self-exclusion

Available from inside the app, and honoured immediately.

03 Limits

Velocity limits per period, and identity tiers that raise them deliberately.

04 Territory controls

Paid entry is switched off where we do not serve. Free tournaments and practice stay open, and an existing balance can still be withdrawn.

05 Support that answers

In-app tickets with a real thread, not a form that disappears.

The ten questions everyone asks

Is this gambling?

No. There is no chance element in the win condition, everyone in a group plays the identical board, and the platform holds no position on the outcome.

How do I know the board is really the same?

Play a group with a friend, side by side. It is the same board — that is the point, and it is visible.

What does Game4Pay make?

A fixed, disclosed service fee taken from the prize pool. It is the same whoever wins.

Which currencies can I hold?

Naira and cedis (NGN · GHS). You can hold both.

How fast are withdrawals?

To a verified payout account, as fast as the local rail moves. You are told the state at every step.

Do I need the app?

No. It installs from your browser on any device, and that is the full product.

Is there an iPhone app?

The installed web app is how Game4Pay runs on iPhone and iPad. It gets its own icon and opens full-screen.

Can I play for free?

Yes. Game Lab is free, and free-entry tournaments run alongside the paid ones.

How are opponents chosen?

By skill rating, derived only from settled results. You are not put against an expert on your first day.

What happens to my data if I leave?

Your identity is removed. The financial ledger is retained for the period the rules require — we do not pretend otherwise.

Play the same board. Win on skill.
